

AL-VI-B-241

Loar Farm
Loarville
Private

Late 19th century

This is a story-and-a-half, three bay by one bay log structure with a gable roof.

The house rests on a low, random ashlar/rubble foundation. Weatherboard siding covers the log exterior except where it has fallen off exposing the v-notched logs.

A frame bank barn, a double-pen log barn, and a stone and frame banked root cellar are also located on this farm.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This abandoned log farm house is situated in a hilly, wooded area on Barbers Hill Road approximately one mile past the dead end of Montel Road. (which is off Rt. 55). The house faces south. It is a story-and-a-half, three bay by one bay log structure with a gable roof. A shed roofed addition runs along the rear, north elevation. A wooden porch supported by plain wood posts is located at the west elevation of the addition. The vertical board central facade door, painted to look like a four panel door, is covered by a wooden, gable roofed porch.

The house has a central brick chimney. The windows are broken out but there is evidence of six over six sash windows. The house rests on a low random ashlar/rubble foundation. Weatherboard siding covers the log exterior except where it has fallen off exposing the v-notched logs. Corrugated metal covers the roof.

On the inside there are two rooms on each floor. The log walls and chinking have been left exposed in the first story east room. In the west room a narrow boxed stairway leads to the second story.

A well is located to the east. A stone and frame root cellar is located northeast of the house. A hewn frame bank barn on a fine ashlar foundation is located also to the northeast. A banked, double pen, saddle notched log barn on a stone foundation is located southeast of the house.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This house is a common western Maryland type. Houses of this general rectangular configuration constructed of logs covered with weatherboard siding were built in Allegany County through the nineteenth century.

The buildings on this property display several significant construction features. The log barn is a good example of such structures built in the late 19th century.

The dwelling is a good example of a simple log farmhouse. The painted panels on the batten door indicate an attempt to upgrade a simple vernacular feature to a more stylish level.

The root cellar includes the unique combination of stone nogging over its wooden-framed ceiling. This is reminiscent of "double-floors" constructed between cellars and first floor levels of late 18th and early 19th century dwellings in Western Maryland, particularly those structures built over a spring. The Hager House in Hagerstown (WA-) and the Superintendent's House in Eckhart (AL-V-A-018 ; demolished 1981) utilized such floors.
